

U6FS GAS METER HOUSING

SUITABLE FOR A U6 METER

HOUSING DIMENSIONS: 500mm wide x 275mm deep x 560mm high

The Gas Care GC range of products incorporates ventilation and explosion relief requirements as directed by:

IGE/GM/6, IGE/GM/8 - Institute of Gas Engineers
T/SP/PRS/35 - National Grid Gas (Transco)

The U6FS is free standing and is suitable for installation, upon a concrete base, away from the premise with both the inlet and outlet supply being run underground. The housing is designed for the meter to be installed using the standard fixing kit with the inlet to the left, outlet to the right.

The installation must be carried out as approved by the qualified gas installer.

SPECIFICATION:

Manufactured with BS476 Part 7
Class 2 resin
Manufactured in glass reinforced plastic
Standard colour - British Racing Green
Maximum service size - 32mm
Outlet size - 32mm
Suitable for low or medium pressure installations
